I oppose the amendments and recommendations.

Do you have any additional comments about the black bear rule amendments or recommendations?

The bear harvest has already been on an increase the past several years, with depredation decreasing each year. Deer units on a predator management plan should have to show proof that bears are the reason or a substantial part of the reason the unit is below objective before we increase tags. Humans are the deers biggest predator and tags should be decreased for deer and keep the human predator in check for harvest. Much of the state is not having an increase in bear numbers and units such as the Bookcliffs are seeing less bears and this is from a person who has hunted the Bookcliffs for over 3 decades.

I hunt deer on Cedar mountain in Iron County. Never have I seem more bear signs. We have two many bear. I thing we should remove all restrictions on killing bear. If a bear shoes up in a camp ground or a person residences it should be shot on sight.

These are unscientific and clearly biased toward maximizing mule deer numbers for hunters. Please read Sand County Almanac by Aldo Leopold. Bears are ecologically important and their numbers should not be artificially depressed. Thanks for your consideration.

Humans are rapidly encroaching on wild lands and destroying the habitat of other species. Our response is to eliminate those species for our entertainment. I know what this amendment was sported by voters, but so was medical marijuana and anti gerrymandering, which have yet to be enacted. Humans are not the only species on earth, we just act like it. "Managing wildlife" will have dire consequences for all species. Killing is not conservatism.

I voted for the initiative on the voting ballot, not knowing that it was really about harvesting more bears. I would not have voted for it if I had known this.

I believe that hunters are not the answer to wildlife management as they are unpredictable and often inexperienced.
